

Business Profile

Bizpayapi Is India's Top Api Service Provider And Integrated Payments Solution Provider, Allowing Your Company To Accept, Process, And Distribute Payments Via A Variety Of Products. Bizpayapi Accepts All Payment Options, Including Credit And Debit Cards, Upi, And Popular Mobile Wallets.

Welcome

Greetings and a warm welcome to the best API, AEPS, BBPS, DMT and Payment gateway in the world, which supports all major API service providers.

Here's the information about our products and services as well as our company's background. Only proprietors and private limited companies can make payments with Bizpayapi. All BBPS services are provided by a licenced firm. Broadband Postpaid, Cable TV, Credit Card, DTH, Education Fees, Electricity, Fastag, Gas, Health Insurance, Hospital, Housing Society Insurance, Landline Postpaid, Life Insurance, Loan Repayment, LPG Gas, Mobile Postpaid, Municipal Services, Municipal Taxes, and Water Subscription are some of the services that we provide. To provide a hassle-free experience for our clients, we have bundled all of the BBPS services into one. Customers or shops cannot make payments directly to us. Please keep this in mind and allow us to use this platform for virtual E-collection in the future.

We build software for a variety of products. BizpayAPI Private Limited is a company that has never looked back. BizpayAPI Private Limited is a company that has never looked back. We are trying to influence business service modules by leveraging IT advancements.

About Bizpay API

- Bizpayapi's solutions are 100% PCI DSS compliant and protected by a PCI DSS-compliant and certified solution. We want to establish a technical environment in the service business that produces good results, saves time and money, and increases customer satisfaction.
- Bizpayapi's Payment Gateway is a system that handles end-to-end payments.
- Bizpayapi's Payment Gateway accepts the widest range of payment methods and Online Bill Payments. We cover everything from domestic and international credit/debit cards to UPI and mobile wallets.
- The Payment Card Industry Data Security Standard is a set of guidelines developed, mandated, and registered by the branded cards and the Payment Card Industry Security Standards Council to ensure that every transaction is secure and that no data is lost.

Company Timeline

Fintech now encompasses a variety of industries, including retail banking, fundraising, and investment management, to name a few. Digital payment companies are one of the most successful types of fintech nowadays. Over the years, BizpayAPI has transformed finance, particularly in the consumer space, where access to financial services and payment methods has grown. Our corporation was founded in January 2020 and is based in Ahmednagar. We initially offered API services, AEPS services, and BBPS services, but BizpayAPI services have emerged over the years, and we now offer many services such as DMT, Micro ATM, Aadhar Pay, Pan card service, Banking service, Software Development, Travel Booking, Hotel Booking, and Flight Booking services.

With the world still recovering from a major pandemic, looking into a crystal ball and predicting the future is challenging. The underlying technology that has driven the Fintech 3.5/3.5 era, namely blockchain and open banking, will, however, continue to drive future innovation.

We are committed to providing world-class services to our clients in the future, and we will continue to expand our offerings to improve the user experience.

Our goal is to earn our clients' trust and confidence by providing them with crystal clear communication, reasonable and impartial advice, and a genuine and perceptible interest for their long-term financial success.

What's Our BUSINESS FOCUS

We Specially focus on three main factor of business for that business required to grow, we think for solution, we do best marketing, always focus on business growth factor that affects business.

Company Mission

VISION & VALUES

01 Our goal is to earn our clients' trust and confidence by providing them with crystal clear communication, reasonable and impartial advice, and a genuine and perceptible interest for their long-term financial success.

02 There is a developing API aggregation platform middleware market. Our solutions enable you to integrate banks into your fintech app utilizing a single aggregated API that handles all of the heavy lifting's of working with each bank.

Competitive Differentiation

- API with a success rate of 99 per cent or higher
- For a basket of services, a single API/Wallet is used.
- Transaction Processing Capacity is High.
- Allow the user to share the API Downline with others.
- With best-in-class service and rewards, we provide a high return on your investment.

Highlights

- The dashboard created by Bizpayapi is the most complete, data-driven, and analytical dashboard available.
- We are determined to ensure strong security so that this private information does not fall into the wrong hands. Payments Compliance enters the picture at this point.
- The payment dashboard aids in the evaluation of real-time data and the extraction of insights from the various reports, allowing you to make more educated business decisions.

Our Services

API

API Services

APIs have transformed the payment solutions that enable transactions to be processed faster, more efficiently, and at a lesser cost. This benefits both payment companies and their customers.

AEPS

AEPS Service

The Aadhaar Enabled Payment System is a bank-led approach that allows online financial transactions at the point of sale using Aadhaar verification through any bank's correspondent.

BHARAT BILLPAY

BBPS Services

The Bharat Bill Payment System is a comprehensive bill payment system that offers clients interoperable bill payment options both online and through a system of ground agents.

Domestic Money Transfer

Domestic Money Transfer API is a good opportunity for site owners, SMEs, and other businesses to make extra money. Route your online money transfer business for the most profit at the lowest cost.

Micro ATM

To identify the consumer, the best micro atm solution provider company in India employs identifying evidence, most commonly the Aadhaar, which is linked to the user's bank account. For each transaction, the Micro-ATM prints a receipt.

Our Services

Aadhaar Pay

Aadhaar Pay, the government's digital payments scheme, is at risk. Experts believe it will now be limited to rural areas, where the vast majority of the people already have Aadhaar-linked bank accounts and are eligible for government benefits.

Pan Card Service

The PAN Card API allows a business correspondent or agent to deliver PAN enrollment, verification, or update services on a single platform at a low cost and with higher commission rates.

Banking Service

Banking APIs enable banks and fintech companies to integrate their services into non-financial applications. Service providers must first understand what an API, in general, involves before understanding what an API in banking entails.

Software Development Services

Software development operations such as gathering requirements, prototyping, testing, and maintenance are all examples of software development activities that are often performed without the need for hardware.

Travel Booking Services

Travel booking service providers in Pune provide you instant access to thousands of third-party travel deals. By offering a varied selection of travel items as individual services or packages, you can become the ideal online destination for passengers and partners.

Our Services

Hotel Booking Services

Hotel Booking Portal was designed with two-step confirmation in mind. Customers can search for available rates for a certain number of days before and after check-in by using a flexible date search.

Flight Booking Services

B2C flight booking system allows you to sell a large inventory of flights from a variety of carriers straight to your customers. API stands for Application Programming Interface, and it's a way for one company to have legitimate access to the products of another.

Platform

- All Digital Payment Services are catered to.
- User-friendly interface with minimal help
- With a simple interface, you may connect to service platforms.
- Associating with a large retail network
- API that is 99 per cent or more reliable
- Capacity to Process Transactions at the Highest Level
- Achieved the fastest transaction speed possible
- SSL implementation
- Platform that enables the creation of one's website
- Utility that simply plugs in and works
- Before processing transactions, operators and denominations must be validated.
- Additional functions include Change Parent and Reverse Balance.
- Super Distributor, Master Distributor, Retailer, and API Partner are some of the layers that are used.

USP

- The core of the team has experience with the API payment system.
- Secured Transaction: Implementation of essential protocols and technology to improve security.
- Support & Maintenance: Dedicated support is available 24 hours a day, 7 days a week via phone, email, and Skype.
- Reporting: Transaction status is updated in real-time, with clear reports.

Supporting Partners

We have formed alliances with leading solution and technology partners to provide you with innovative solutions to the complex problems faced by your business

-  Upi
-  Bharat Billpay
-  Icici Bank
